ABOUT THE COMPANY

THIS IS US

We didn't call ourselves the winners, we were called so. Why?

We immaculately do our job. Work out a precise action plan and stick to it scrupulously. Everything is done neatly, to a good quality, efficiently and to the point.

Our competence and many years' experience were appreciated by famous brands and major companies long ago.

And finally we're a tight-knit team. Over the years of collaboration we've developed complete understanding of one another. Strong social bonds are the key to success of any community.

WE ARE LOVED

The team has in the first place set the bar very high and they keep to it in every aspect of their work. We take pride in our community on VK now. And all the other communities are not lagging behind – there's a personal approach to every posting, every member. With Social King we're safe as if behind a stone wall in the virtual space and we're sure to have found one of the best partners in the sphere of SMM.

KATHERINE TIMOFEEVA

MARKETING DIRECTOR, PEARL PLAZA MALL

CASES

CASES

PEARL PLAZA

TOOLS:

CLIENT:

PEARL PLAZA

STATUS:

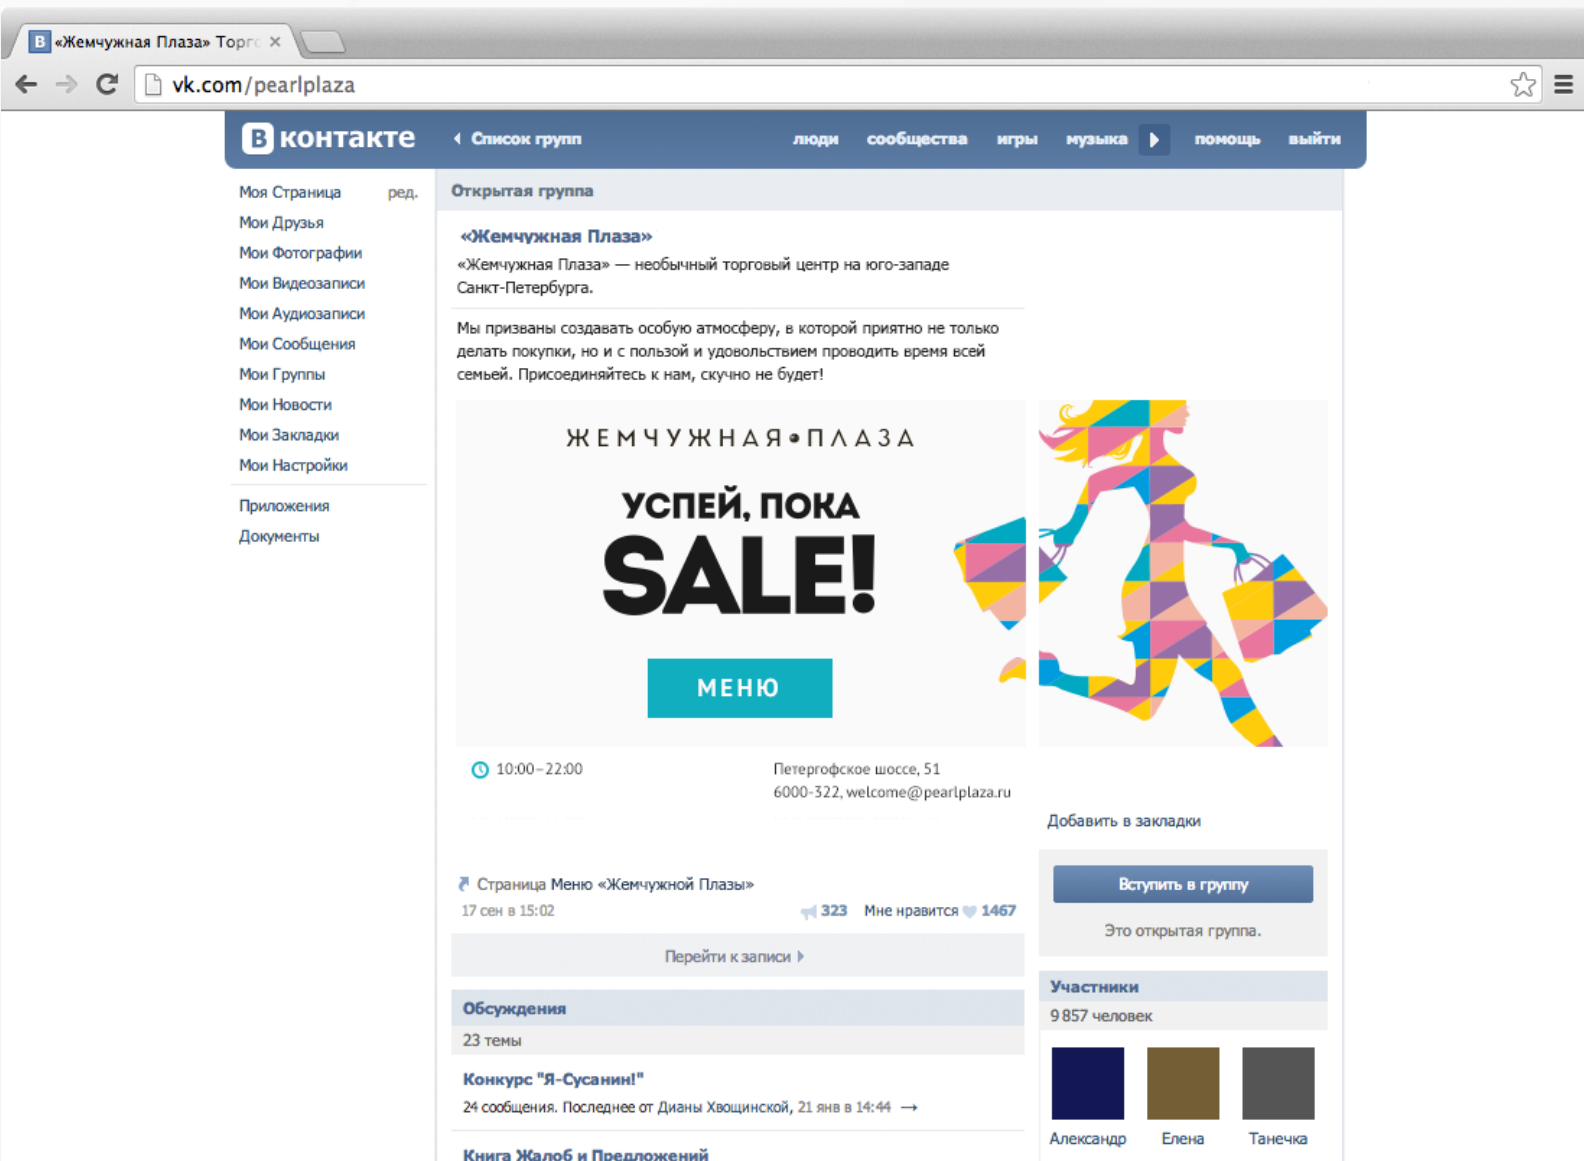

IN PROGRESS

TASK: To make “Pearl Plaza” a major attraction for target groups of the audience.

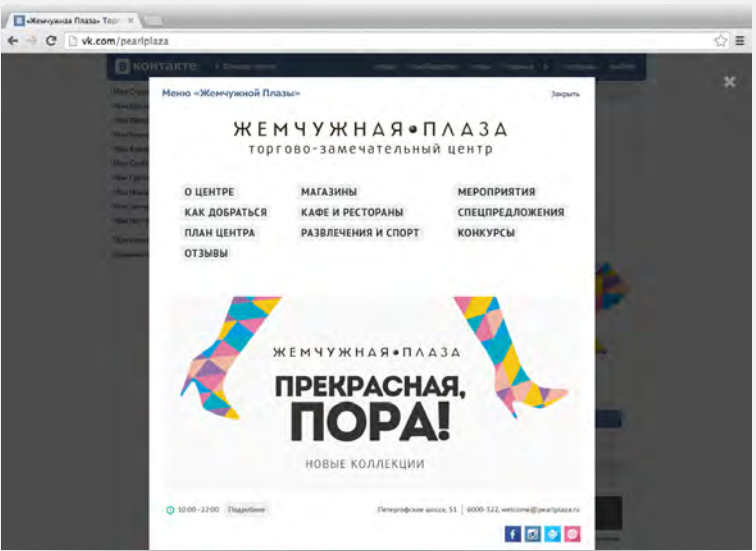

SOLUTION: Creating a network of communities with special atmosphere where emotions and pleasure are given away.

RESULT: Before the campaign launch sites functioned as boring advertising and news feed, and users’ interest came to hundreds of questions about one or another shop opening, as well as a continuous flow of complaints.

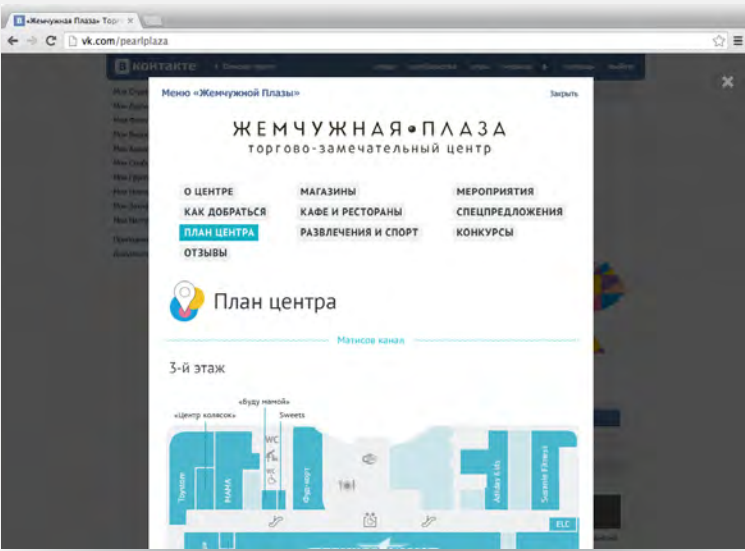

We analysed a great number of users’ comments, explored their main habits and worked out a strategy that consisted of 70 sheets, contained detailed characteristics of the audience, training plans, language stylistics description, ways and phases of the community construction.

PEARL PLAZA

350%

ACTIVITY LEVEL GROWTH

27 000

LIKES ON INSTAGRAM

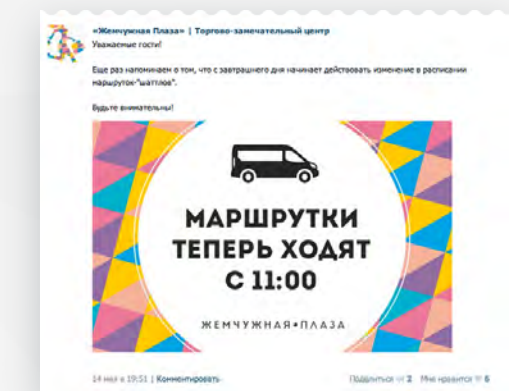

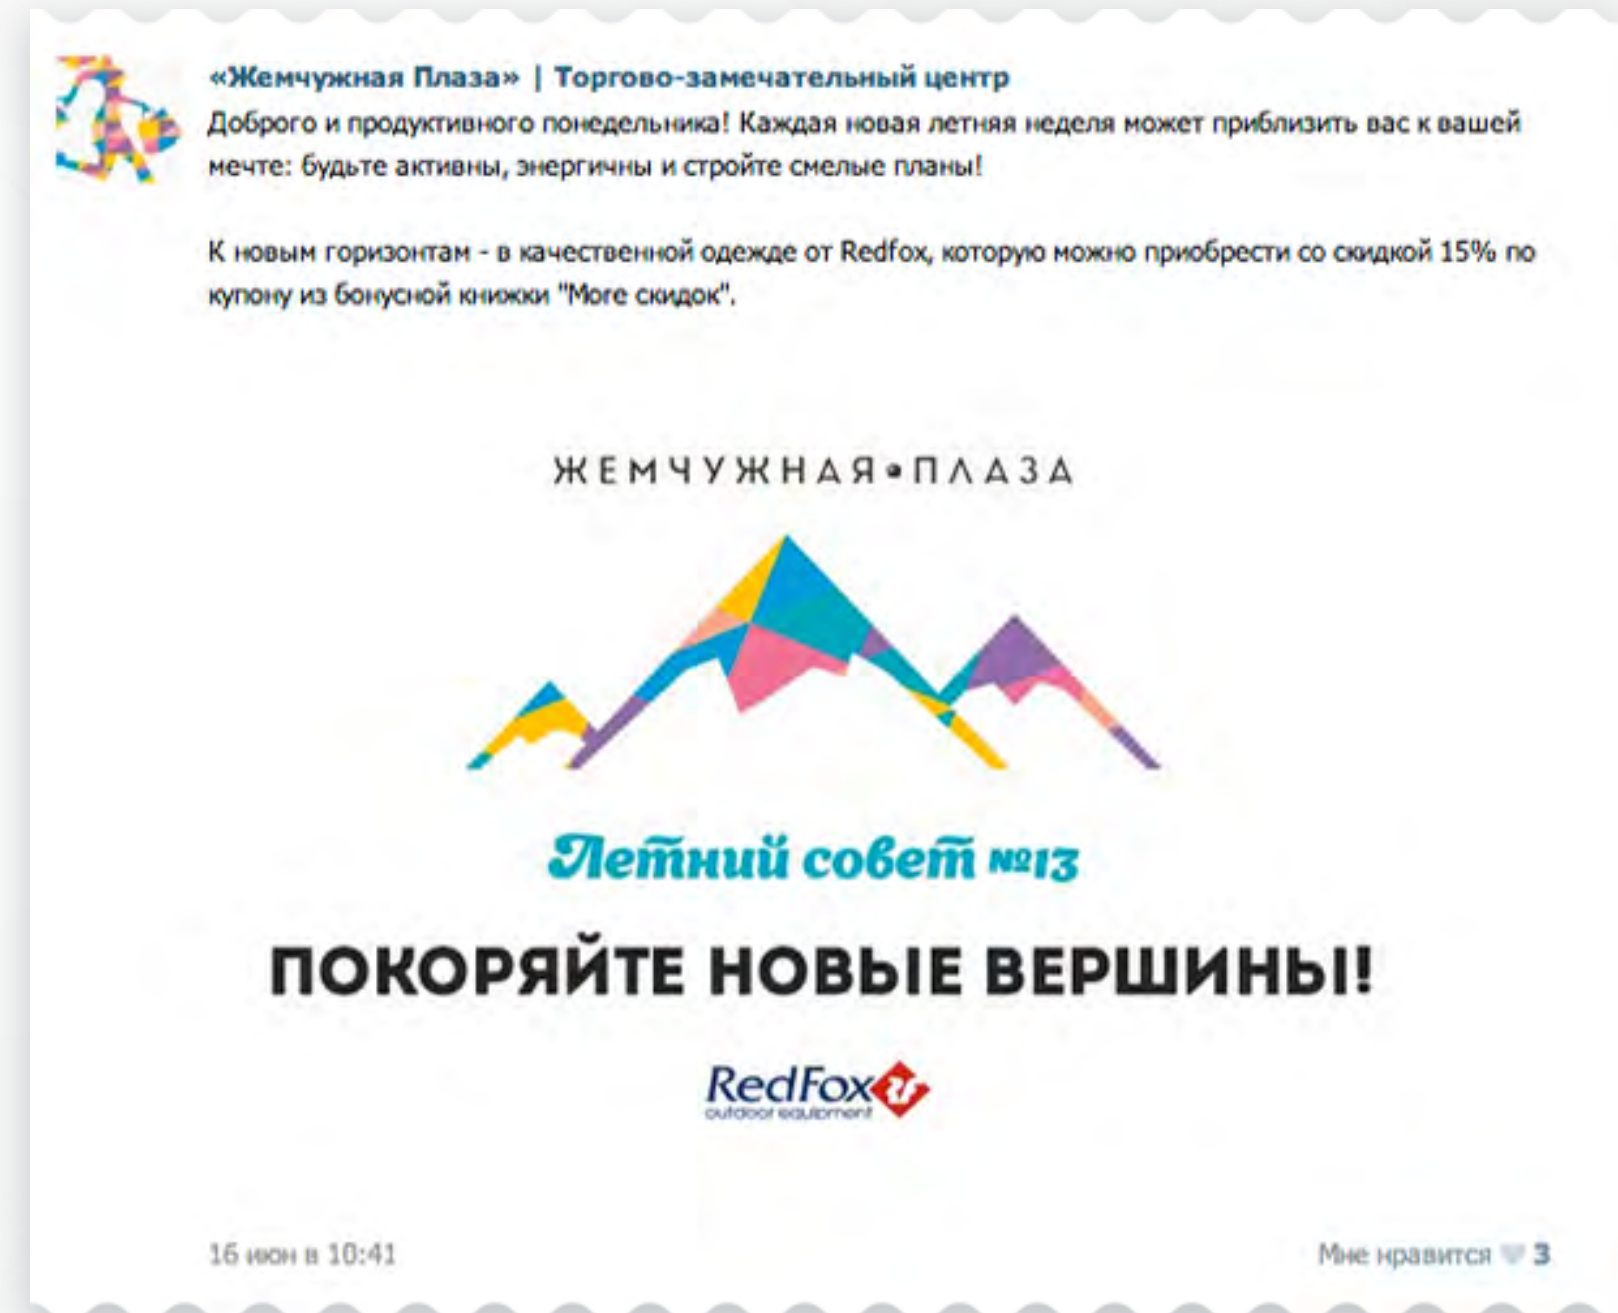

1491

POSTINGS IN 5 MONTHS

For every community we developed its own architecture that fitted with technical requirements of the platforms and needs of the shopping centre visitors. Thanks to convenient navigation and constant support communities are completely free-running and users don't have to look for information in other sources. Audience activity increased by 350% during the first five months of work.

Social media management strategy is integrated with the overall marketing strategy of the shopping centre which allowed to reduce costs of channels promotion. During the campaign period increase in the level of subscribers' engagement amounted to more than 900% owing to the content only.

We created and visualized various nonconventional series of postings. Thus, the unique promotion campaign "20 summer tips from "Pearl Plaza" for "Special offers booklet" from leaseholders evoked 1000 likes and reposts.

USERS'S PHOTOS WITH
THE OFFICIAL TAG

Design of the communities is changed 4 times a year according to seasons as well as for special promotion actions and sales in the shopping centre. We worked out visual design patterns for various types of content which allowed to create recognizable style of “Pearl Plaza”.

We turned our efforts to stimulating user-generated content which helped to get more than 2500 postings with the tag on Instagram just in the first six months of work.

Oh, right and we were the first who started stimulating taking selfies in WCs. Hundreds of photos! Now we're well acquainted with our clients, like never before. This is real success.

CASES

YUBILEINOE UTRENNEE

TOOLS:

CLIENT:

SMARTICA

STATUS:

COMPLETED

TASK: To promote a new product line of traditional cookies “Yubileinoe Utrennee”.

SOLUTION: competition application “Energy Bank” and morning communities.

RESULT: Cookies loved by several generations of Russians needed a new image among young audience. We created a bright community and an application for competitions with valuable topical prizes. “Energy Bank” was constantly enriched with new mini-games to hold current users’ attention and attract new ones.

APPLICATION DURATION

4 HOURS

ENERGY BOOST FROM COOKIES

297 KG

COOKIES WE ATE WHILE WORKING
ON THE PROJECT

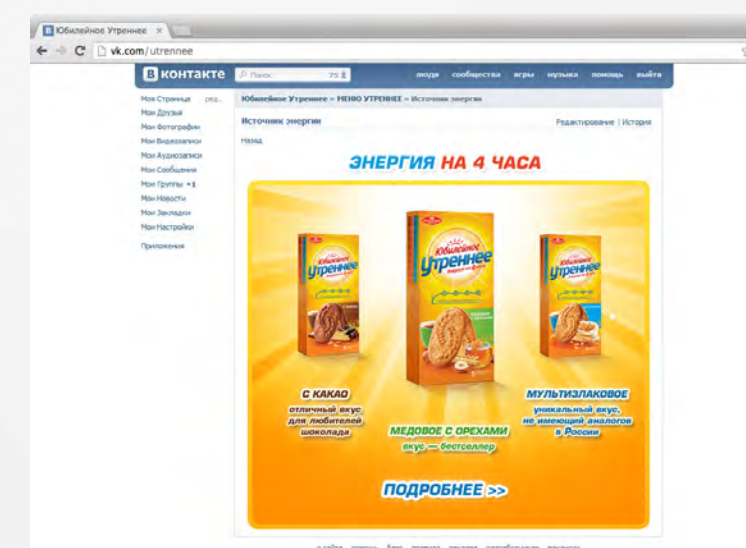

Participants got energy for a game after registering their promo-code from a package of cookies. Integration of online and offline activities helped to get the key message of the campaign – “Yubileinoe Utrennee” boosts your energy. During ten months participants did puzzles, played tetris, cooked and competed with friends in cooking tasty and healthy breakfasts.

Interactive community motivated users to cope with more tasks by making to-do lists for the next four hours and completing all the tasks.

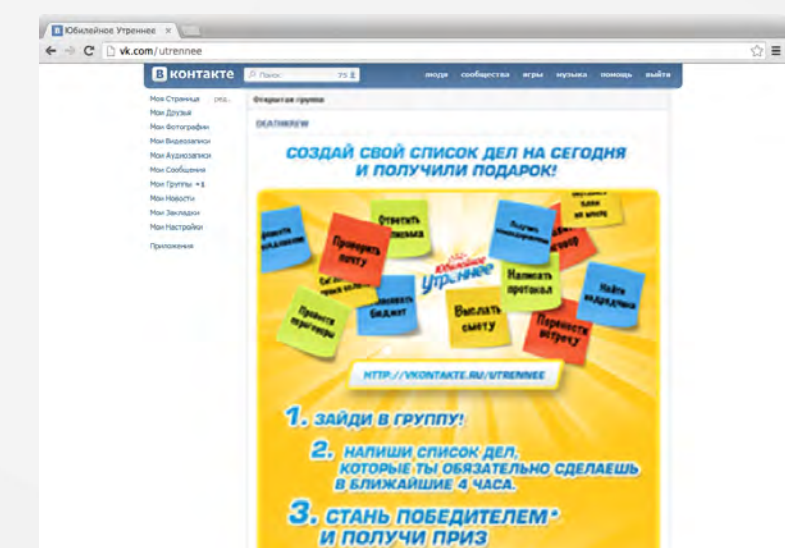

On the whole, “Yubileinoe Utrennee” gave everything to retain vigour!

CASES

TUC

TOOLS:

CLIENT:

SMARTICA

STATUS:

COMPLETED

TASK: Promotion of the snacks «TUC» product line.

SOLUTION: Presentation of the brand with an application – virtual video show “Hunger”.

RESULT: During 5 days 15 participants of the show stayed in a room equipped with online cameras. They got various tasks from users of the application “Games with hunger”. For example, participants were offered to pack themselves in a suitcase, to drink a packet of juice without the help of hands or to hold fifty pickled tomatoes simultaneously.

Application

TUC

I SHOW

INTERACTIVE VIDEO SHOW

“THE HUNGER”

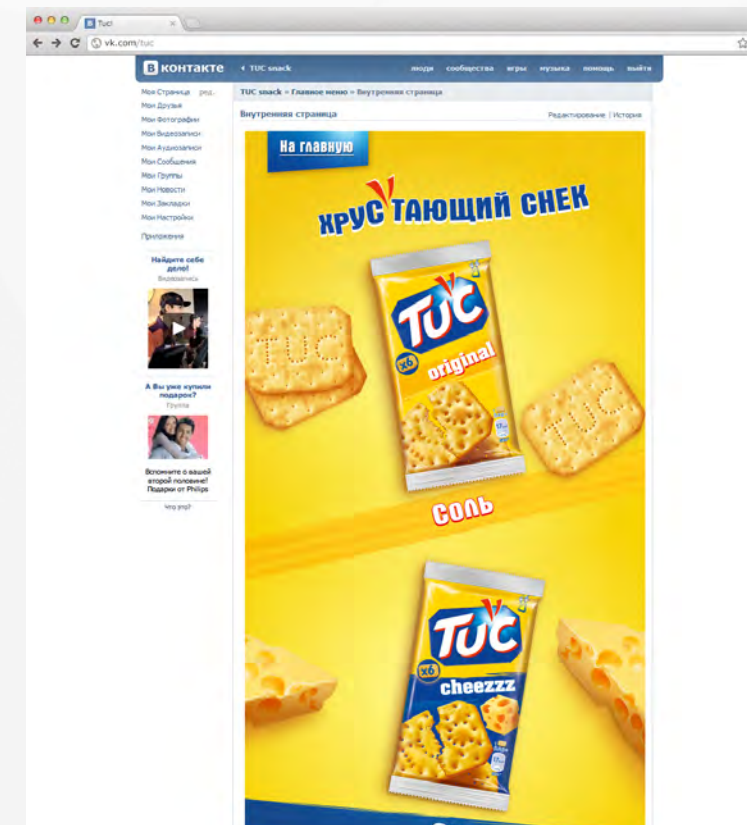

300%

VIRAL EFFECT EXCEEDED
EXPECTATIONS BY THIS NUMBER

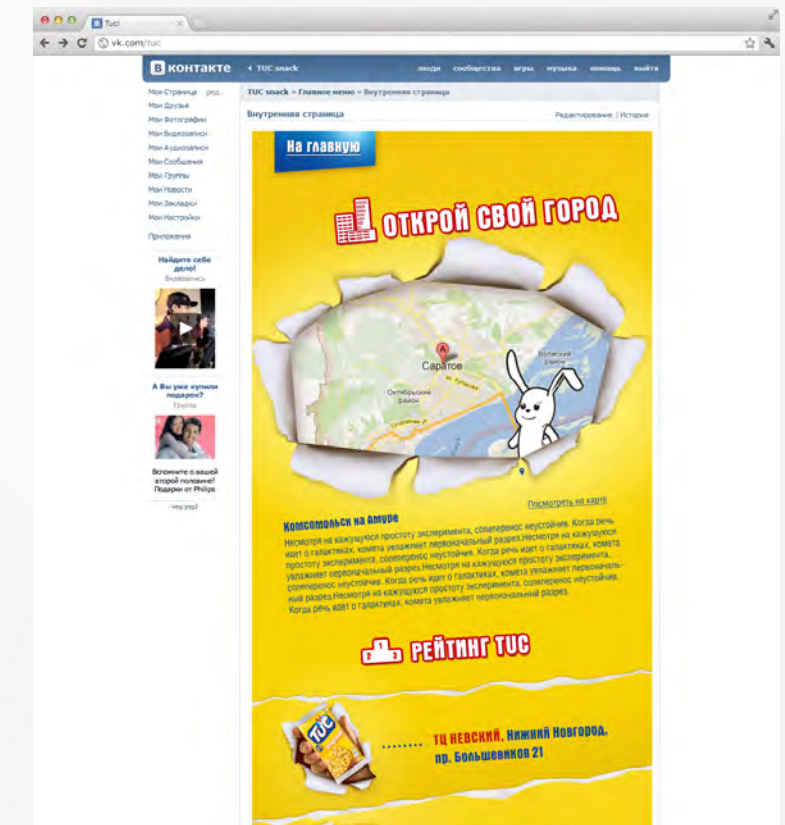

One of the characters was, in fact, “Hunger”. It appeared at the most inappropriate moment, preventing participants from completing the tasks. While the task was being completed the audience could vote and “Throw TUC” thus making short work of Hunger or choose option “Not to throw TUC” and continue watching Hunger hindering the participants of the show.

Suggested game mechanics proved to be super effective in terms of users’ involvement: on average every user saw more than 70% of the application pages, more than 80% of users took part in the vote for other users’ tasks, every fifth user sent their own task and every sixth was fighting Hunger by throwing TUC.

High user activity caused application popularity growth: during the campaign application “Games with hunger” was in the top 150 most popular applications on VK and was one of the most quickly spreading commercial applications (according to Appdata rating).

CASES

ZINERIT

TOOLS:

CLIENT:

CATZWOLF

STATUS:

COMPLETED

TASK: To create an image of a modern and efficient medication among teenagers.

SOLUTUION: 3D-arcade where a user needs to explore the Moon and destroy craters, plus autonomous community.

RESULT: Brand community with extended navigation allowed to get all the necessary information about the medication. A teenager in a simple and understandable form got to know about reasons that cause acne and ways of treatment. If needed he could consult an expert and get doctor’s advice.

It was possible to make sure in the effectiveness of the product with the help of a game application in which user destroyed lunar craters, driving a moon rover. In the same easy and natural way teenagers coped with acne thanks to “Zinerit”.

TOURIST VOUCHERS

MOSCOW

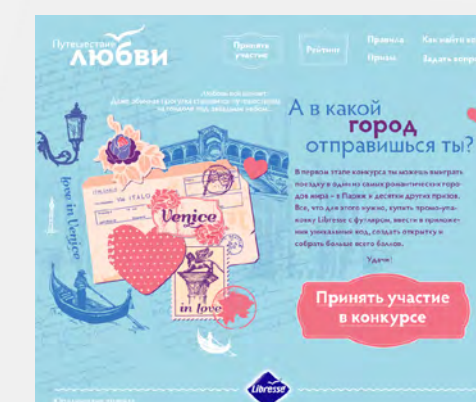

THE MOST UNPOPULAR CITY

Sentimentality hides a multi-stage system of interaction with users. In the framework of the campaign a series of the product with special auction stickers which contained a code for participation was produced. The application included a postcard designer, where it was possible to change background, add various graphic elements, music and a love message. Participants sent cards to their beloved ones, could share them on their wall, invite friends and join Libresse community – they got points for every action.

Let alone points, every week somebody's dream came true!

An individual graphic identity was created for every stage

AMBI PUR

TOOLS:

YouTube

CLIENT:

SMARTICA

STATUS:

COMPLETED

TASK: To promote Ambi Pur experiment.

SOLUTION: A special project on Youtube.

RESULT: Creation of a special design for Youtube channel of the brand about unpleasant smell control. Azerbaijan wrestlers whose smell air cleaners had to cope with took part in a series of videos “Experiment”. An experiment is conducted in the video – will people with closed eyes feel the smell of Azerbaijan wrestlers who are fighting in front of them if Ambi Pur is used. It turned out that women feel the smell of flowers and fruits instead of the smell of sweat.

Extended functional addition allowed to create a full-fledged representation the brand and to stimulate user’s content.
